

Year 4 Ambrosia Newsletter

Friday 23rd November, 2018

This week we have continued our inquiry into how science has helped to change the world.

In maths, we have been converting metres to kilometres and vice versa. We have also calculated perimeter by counting squares and also by calculating using our knowledge of rectangles to find missing sides.

In English, we have role-played the coming of the space dragon from The Iron Man and have written newspaper reports.

During our inquiry lessons, we have researched environmental issues, choosing an area that interested us to research further. We have created presentations to share with the class so we all found out about issues that our world currently faces. We also started to develop ideas for our inventions as part of the #Leighideas2018 competition. We will continue developing our ideas and creating models of our designs next week. Please can you continue to send in recyclables that we can use.

The soundcheck area of TT Rockstars will resemble the forthcoming Year 4 multiplication tests. Please have a look to see the speed that is required.

Home Learning this week:

Reading with your child.

Read Theory.

Times Table Rockstars.

Spellings will be given out on Mondays to be learned for the following Monday.

This week's homework is time for the topic task. This does not have to be submitted until the last week of term so the children can spend time on their finished piece.

Thought for the week:

Star of the week goes to...

Crystal

for her effort with her research into environmental issues.

Congratulations!
